

# WE ARE LOOKING FOR PARTICIPANTS

## Who?

We are looking for participants who

- a) With/without a beard; or
- b) Are willing to grow a beard & shave it for the study

## What?

We are studying the effects of varying lengths facial hair on the effectiveness of breathing respirators. The study will be conducted at the Environmental Medicine and Physiology Unit at SFU Burnaby. Participants will perform a series of fit tests on ten types of facial respirators. Participants who are willing to shave on test days will re-do the series of fit tests with a clean face. Those who do not want to shave or have a clean face only, will still be tested in the control categories.

## To Qualify

Participants must be healthy, at least 19 years of age, with no respiratory disease and are able to tolerate wearing a respirator style breathing mask.

**As a thank you for your time, you will be offered monetary compensation.**
